## Edit Family

Name\*

Sex\*

Date of Birth\*

Relationship\*

Medical Insurance

Dental Insurance

Vision Insurance

Medical History

☒ Expand to enter details

The same screen will be used to ADD a family member. Changes that will happen:  
Breadcrumb will say "Add Family"  
Page Caption will be "Add Family"  
Save button will be "Add"

Opens up a calendar control to select a date

Drop-down with below values:

- Spouse
- Partner
- Child
- Parent
- Other

When editing self, the Relationship field should be un-editable and set to "Self"

Medical, Dental and Vision Insurances are drop-downs with values from Insurance information

The fields can be left empty

The fields can also have the same value for all three insurances

**Raja:** Can we have a collapse (default) / expand type of form with medical history details?

This is non-mandatory so don't want to clog the page with details that a user may not even bother to enter
